

- PERMEABLE GRAVEL BINDING -
 Gravel and grit solutions for public and private areas

Create safe, permeable and low-maintenance bound gravel surfaces. Suitable for pathways, driveways, tree surrounds, decorative areas & parking spaces.

CLEAR AGGREGATE BINDING

ROMPOX® - PROFI-DEKO is a highly water permeable gravel binder that prevents gravel displacement and reduces ongoing maintenance by creating a strong, visually appealing bound gravel surface. The high-strength properties of ROMPOX® - PROFI-DEKO make it resistant to ants, weeds, frost, de-icing salt and pressure washer safe up to 2,000 psi.

BENEFITS

- Highly water permeable
- Prevents weed growth
- Chemically inert once cured
- For pedestrian & light vehicular loads

* For lightly coloured gravel binding options, please contact your ROMEX® Representative

GRIT BINDING

ROMPOX® - D7000 is an eco-friendly liquid stabilizer that is ideal for crushed stone and decomposed granite materials, creating a dust-free and durable surface in a few easy application steps. The binder is applied topically and significantly strengthens pathways and surfaces with sufficient fines while protecting against wash out, abrasion and weed growth.

BENEFITS

- Low maintenance
- Easy topical application
- For garden paths & public areas
- Suitable for aggregates with fines
